In addition, our Quality Control Department carry out thousands of random sampling checks each year - all helping to ensure that Argos sells only safe, top quality products.

OUR TRADING POLICY

The Argos prices shown in this catalogue are generally compiled with Recommended or Suggested Retail prices provided by our suppliers. Prices shown in this catalogue were established during May 1987 and already include VAT. However, in the event of changes in the VAT rate, or for any other reason beyond our control, we may have to make adjustments, so please check the Reference Catalogue in your Argos Store.
All sizes, weights and capacities are approximate. Some descriptions may vary if a supplier has changed or altered their specifications after the catalogue has been printed. This catalogue, effective from 3 August 1987, supersedes all previous catalogues or brochures and remains valid until further notice. Information is compiled with all possible care, but the publishers do not hold themselves responsible for errors or omissions.

Now you can choose telephone products in the same way as you choose all your other household items. You buy your telephones outright and you only pay rental on the exchange line.

All Argos telephones are fully approved for use with British Telecom systems. They plug straight into the new style B.T. jack-socket.

What if you don't have the new style British Telecom jack-socket? Simply telephone your local B.T. sales office for information or how they can convert your existing connection point.

The number of telephones you can connect to a line is determined by the "ring equivalent number" (REN) of each telephone you wish to use. The maximum REN for a B.T. line is 4. This means for example, that a maximum of 4 telephones each with a REN of 1 could be connected to the same line.

Remember, when you buy your phone, you only pay rental on the exchange line.
